Allow

"QX Air" would like to pair with your iPhone.

When connected, all notifications you receive on your iPhone will also be sent to QX Air and may be shown on its display.

Introduction to core functions

Sports status: Real time recording of steps, distance, calories
Heart rate: Real time recording of heart rate index
Sleep monitoring: Accurately record deep sleep, light sleep, and sporadic naps during lunch breaks.
Blood oxygen saturation: real-time recording of blood oxygen index
Pressure: Real time analysis of the current pressure situation
Emotion: Real time analysis of current emotion index
HRV: Real time analysis of current heart rate HRV index
Other functions: Information reminder, phone reminder, alarm reminder, multiple exercise modes

FCC Warning
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
